

## ec camitec autoparts (nantong) co., Ltd.

is located in Nantong, Jiangsu Province of P.R. China.

Our company is the Joint-Venture between Nantong Fortune in Hong Kong and camitec GmbH in Germany.

Meeting or exceeding customers' expectations is essential to our business. Therefore, we work as a team with customers in the design and development of complex products from concept through tooling development, prototyping and pre-production runs. Through a combination of value analysis and value engineering, we design products for structural integrity, improved functionality and process integration. We work with customers at whatever level they require whether consulting on an existing design or designing a new product based on supplied specifications for functional performance and a dimensional envelope.

We welcome tough challenges and new applications. Specifications are thoroughly analyzed at the beginning stages to see where we can suggest improvements in material selection, tolerance levels, die configuration and manufacturing processes, so there are no surprises later. Our ability to design automated processes for complex parts can eliminate labor and provide high quality, cost-effective components and systems

Our **blister machine** is mainly used for forming all kinds off open-wide thin vessels by vacuum-forming roll-film slices of light decomposition, starch biology decomposition environmental protect slice material, Fiber-coating-sheet, **PVC, HIPS, PP, PET, EPS, PS** etc.

Vessels like foodstuff case, western-style food case, candy cake box, cake products inside lining, medical articles and non-foodstuff packing vessels, art relievo, all kinds of sample product , special local products, tour articles, textile, children toys, electrical apparatus components, daily used metals etc.

EC has been providing Product Design and Development services for over 10 years.

We offer a full line of Engineering Services that include the following advantages:

- Product Design (Pro E, Autocad)
- 3D models
- 2D part prints
- Prototype Tooling
- Process Flow Analysis
- FMEA
- Production Tooling
- IQ, OQ & PQ Process Validation
- located in the north of Shanghai
- logistics with own trucks
- experience in producing several models of blister trays

-Our main customers are:

 brose

TOYOTA

BOSCH

Söhnergroup
